

# Mihai Cocîlea

## Front-End Developer

As a passionate front-end developer with a knack for adaptability with an insatiable curiosity and a deep understanding of modern web development, I bring a fresh perspective to every project I work on. My true passion lies in collaborating with a talented team, leveraging our collective expertise to craft seamless and user-friendly interfaces. I embrace challenges and actively seek out opportunities to push the boundaries of what's possible in web development.

- COMMUNICATION SKILLS
- ADAPTABILITY
- FAST LEARNER
- CREATIVITY
- PROBLEM SOLVING

## Experience

○ 09/2022 - 05/2023

IV Future SRL - Galați, Romania

### Front-End Developer

- Developed new user-facing features and tested already existing functionality.
- Refactored the application code to be mobile responsive.
- Reviewed code and debugged errors to improve performance.
- Implemented additional UI/UX for pre-existing applications.

## Personal projects

○ Human Resource Management Internal Software - IV Future

Developing a HR application has provided me with a solid understanding of front-end development. I have honed my skills in technologies such as HTML, CSS, TypeScript and frameworks such as React and MobX. I have learned how to handle API requests and parse the JSON responses, also state management with the MobX library.

○ Personal Portfolio

As a web developer learner, I developed landing pages for affiliate marketing collaborations with CarVertical.com and Soundhouse.ro. The landing pages were designed to promote the respective products and services using HTML, CSS, Bootstrap, and JavaScript. The source code for some projects is available on my Github profile.

- <https://www.istoric-auto.ro>
- <https://github.com/mihaicocilea>

I also developed a landing page built in React, using TailWind CSS and Material UI, plus other libraries for some features (Facebook Pixel, etc). The site was made to promote a product and present it's features. It is responsive and is focused on the mobile user experience, but also desktop look very good.

○ Bachelor's Degree Project

For my Bachelor's Thesis, I developed an e-commerce website for auto detailing products using HTML, CSS, Bootstrap, PHP, and MySQL. This project involved adapting, modifying, and improving an existing website, rather than creating it from scratch. I identified the existing website's strengths and weaknesses and made the necessary changes to improve it's functionality and user experience.
